Build a page that has an editable data grid and is JSON enabled. Page layout should be as follows,

Column Master

Add Column	Remove Column

	Column Name	Column Type	Editable
☑	Column1	Number	Yes
☑	Column2	String	Yes
☑	Column3	Date	No
☑	Column4	Boolean	Yes

* See Page 2 for Add Column Button Details
* Remove Column should remove the column rows that are marked (checkbox to the left)

Result Data Grid

Add Row	Delete Row	Export to JSON

	Column1	Column2	Column3	Column4
☑	1001	String1	03/07/2015	Dropdown ▼
☑	1002	String2	03/07/2015	Dropdown ▼
☑	1003	String3	03/07/2015	Dropdown ▼

* Add Row should add a blank row and default the date
* Delete Row should remove the data rows that are marked (checkbox to the left)
* See Page 2 for additional details

Additional Notes

* **Add Column** button should give a detail popup that looks as below,

Column Name [   ] (Maximum Length of 15 characters)

Column Type [Dropdown ▼] (Values, "Number", "String", "Date", "Boolean")

Editable [Dropdown ▼] (Values, "Yes", "No")

[Add Column]   [Close without Adding]

Additional Notes for Data Grid

* 1. Date Columns shlould present a Date Picker when in Editable mode

    2. Boolean Columns should be Combobox, with two values, "Yes" and "No"

    3. Number Columns should only allow entry of Numbers

* Export to JSON should export the rows from data grid into a JSON file
